Developed and maintained PHP-based web applications using Laravel. Designed and implemented dynamic and user-friendly features using PHP, JavaScript, and AJAX. Created and optimized database structures using MySQL to improve performance. Integrated third-party APIs ,CRM , and social media platforms.

PROJECTS

Project Name **Sommelier**
Description

A restaurant food ordering and table booking application designed for a seamless user experience. Built using React Native for the mobile frontend and Laravel for the backend, the application enables users to browse menus, place food orders, and reserve tables effortlessly. It integrates with secure payment gateways to ensure safe transactions and uses Laravel for managing orders, bookings, and user authentication. The system delivers a smooth, efficient, and user-friendly experience tailored for restaurant operations.

Role **Full Stack development (Development/Bug Fix) Project**
Duration **Feb 2024 – July 2024**

Project Name **Researchcollab.ai**
Description

An interactive online platform designed for research collaboration and knowledge sharing. Built using WordPress with Elementor and Beaver Builder for frontend customization, and powered by PHP and MySQL for backend operations. The platform allows researchers to publish,share, and collaborate on research papers efficiently. It integrates dynamic content management, real-time search, and role-based access control to provide a streamlined experience for contributors..

Role **FullStack Development (Full Design , Plugin Handle)**
Duration **Jan 2025 – Feb 2025**
